Professional Summary

Android Engineer with 4+ years of experience at Bank Mandiri, specializing in mobile banking and Point Of Sales (POS) applications with millions of users. Proven track record in production support, incident resolution, feature development, and platform migration. Experienced in cross-functional collaboration, platform modernization, and delivering high-availability financial technology solutions.

Work Experience

Android Engineer, Livin' Merchant by Mandiri (POS App)

December 2024 – Present

PT Bank Mandiri (Persero) Tbk. — Jakarta, Indonesia

- Served as part of the production support operations for Livin' Merchant Android app — monitoring application performance, tracing and triaging production incidents, and coordinating with cross-functional teams to ensure high availability and smooth operation for merchant users.
- Contributed to the revamp of the POS module, migrating from .NET MAUI to native Kotlin, significantly improving performance, maintainability, and alignment with the Android-native development strategy.
- Contributed to migrating the Livin' Merchant platform from Azure to on-premise infrastructure to meet internal compliance, data sovereignty, and security requirements, with thorough testing to ensure consistent performance across environments.

Android Engineer, Livin' by Mandiri (Mobile Banking App)

February 2022 – December 2024

PT Bank Mandiri (Persero) Tbk. — Jakarta, Indonesia

- Developed QRIS-TAP using NFC technology, enabling seamless contactless payments via EDC in high-throughput environments including MRT and Commuter Line gates, and retail.
- Built the QRIS G-to-G (Government-to-Government) feature enabling real-time cross-border international transactions with automatic currency conversion, aligned with Bank Indonesia's cross-border QR standardization.
- Enhanced the QRIS source of funds feature, allowing users to dynamically choose between CASA, Credit Card, or Paylater at payment time — improving flexibility and the overall customer journey.

Education

Bachelor of Informatics — GPA 3.74 / 4.00

Graduated August 2020

Telkom University, School of Computing — Bandung, Indonesia
